

課題 13.1 (1) : 解答例

```
#include <stdio.h>

int main(void)
{
    double money;
    int i;

    money = 100000;
    i = 0;

    while(money < 200000) {
        money = money + money * 0.0024;
        i++;
        printf("year = %d, money = %f \n", i, money);
    }

    return 0;
}
```

課題 13.1 (2) : 解答例

```
#include <stdio.h>

int main(void)
{
    double money;
    double d_money;
    int i;

    money = -1;

    while(money < 0){
        printf("Input positive number = ");
        scanf("%lf", &money);
    }

    i = 0;

    d_money = 2 * money;

    while(money < 2 * money) {
        money = money + money * 0.0024;
        i++;
        printf("year = %d, money = %f \n", i, money);
    }

    return 0;
}
```
